PROJECTS

Ocufii Inventory App

- The Inventory App is a comprehensive solution designed to streamline inventory management processes. It offers features such as check-in, check-out, and a detailed summary of current inventory and potential revenue. Built on a MySQL database, the app allows for easy customer creation and device sales. Its automated features, like barcode scanning, manual data entry, ensure efficiency and accuracy.

Pocket Market

- Pocket Market is a mobile e-commerce app that promotes local businesses. It involves a team of 10 people, including a client business analyst, to develop and implement business solutions. The app features a task management system with Kanban-like functionality, Stripe payment integration, multi-language support, live order status, real-time notifications, and navigation features for both riders and customers.

PartsG

- PartsG is an advanced e-commerce platform that specializes in the sale of industrial equipment. Customers have the option to make immediate purchases or request quotations for desired products. The website features a meticulous categorization system for easy navigation and product discovery. Through the admin portal, vendors enjoy comprehensive control over their offerings. They can promptly respond to customer quotations, efficiently manage their product inventory, and ensure seamless customer satisfaction.

Ocufii (Admin Portal)

- Ocufii is a tech company focused on meeting the demand for firearm and weapon tracking and monitoring. The company has developed the Ocufii Admin portal using cutting-edge technologies such as React, Bootstrap, React Query, and the AWS JavaScript SDK. This portal provides real-time updates on the status of each tracked weapon, accurately mapping them to their respective owners. Administrators can access detailed information about owners and the tracked weapons, including the number of active and disabled weapons.
